

Dark & Light Theme Colour System

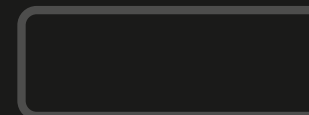

Extracted from the Claude Platform Docs screenshots (6 captures, dark + light).

Primary highlight replaced: original orange #D97757 -> #ABBED3.

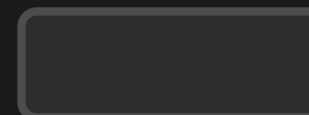

106 semantic tokens, confirmed / approximate / derived / recommended kept separate.

Contents & how to read this document

A designer/developer reference. Every value carries one of four evidence labels - they are never mixed silently.

CONFIRMED	Colour measured directly from screenshot pixels (exact hex, repeated across regions/screenshots).
APPROXIMATE	Observed but ambiguous (anti-aliased text, inferred hover state, or only one sample). Closest observed value given, reason stated.
DERIVED	Computed from observed values or from #ABBED3 using a stated rule (mix %, contrast target).
RECOMMENDED	Not visible in any screenshot. Proposed to complete the system; it is NOT extracted data.

01 Executive findings

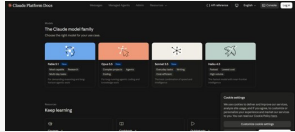

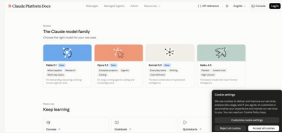

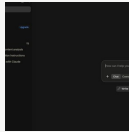

What the screenshots actually say - read this before using any token.

Figure 1 - Miniature of the extracted system with #ABBED3 applied to the brand mark (and the recommended accent "New" badge). Left: dark. Right: light. Drawn from the token values in this document.

- **Source product.** The screenshots show the Claude Platform Docs site in dark and light themes, plus a fragment of the Claude chat app (dark only).
- **Where the orange is.** The only orange UI element is the starburst brand mark (#D97757, identical in both themes). Buttons, links, nav, tabs and inputs are fully NEUTRAL: the primary button is white-on-near-black (dark) or near-black-on-white (light). The coral card header (#F09978) is illustration content, not a UI colour.
- **Consequence for #ABBED3.** The confirmed role mapping is: brand mark #D97757 -> #ABBED3. Everything else that I propose for the accent (focus ring, selected state, badges, links on hover, progress) is RECOMMENDED because the reference does not show an orange version of it. This keeps the original restrained, premium hierarchy - the accent stays rare.
- **Blue elements.** The "New" badge, the "Upgrade" pill and one illustration card use blue (#6DA7EC dark / #184F95 on #CDE2FB light). Because #ABBED3 is itself a cool blue, those are documented as observed values AND given a recommended accent-family remap, so the page does not end up with two competing blues.
- **Light-mode warning.** #ABBED3 has only 1.85:1 contrast against the light page (#FCFCFB). It is fine as a fill, tint or mark, but unsuitable for text or thin icons in light mode; a deeper sibling (accent-strong, #4A6A8E, 5.5:1) is derived for that purpose.
- **What is NOT in the screenshots** (therefore RECOMMENDED only): success/warning/error colours, charts, tables, modals, tooltips, open dropdowns, checkboxes/radios/switches/sliders, validation, focus rings, pressed and disabled states, destructive buttons, light-mode sidebar and composer.
- **Reliable theme facts.** Both themes use warm-neutral (slightly yellow) greys, not blue-greys. The cookie panel is the same dark #20201F in both themes (an inverse surface). #898781 muted text is the same hex in both themes.

02 Screenshot inventory & methodology

PREVIEW	ID	THEME	CONTENT	PIXELS	FILE
	S1	Dark	Docs home - hero, code window, search, buttons, cookie panel	1917x900	Screenshot 2026-10-06 171000.png
	S2	Dark	Docs - model cards, tags, "New" badges, resource cards	1917x846	Screenshot 2026-10-06 171044.png
	S3	Light	Docs home - same view as S1 in light	1917x902	Screenshot 2026-10-06 171149.png
	S4	Light	Docs - same view as S2 in light	1917x880	Screenshot 2026-10-06 171228.png
	S5	Dark	Cookie panel crop - white primary + grey secondary buttons, bottom band	118x260	Screenshot 2026-10-06 172302.png
	S6	Dark	Chat app - sidebar, Upgrade pill, composer, segmented control, Write chip	766x792	Screenshot 2026-10-06 172316.png

Methodology

- **Pixel sampling.** Each screenshot was loaded losslessly (PNG) and sampled by region (mode / most-frequent colour) rather than single pixels. Region samples were repeated across screenshots (S1 vs S2 vs S6 for dark; S3 vs S4 for light).
- **Theme classification.** S1, S2, S5, S6 = dark; S3, S4 = light. S1/S3 and S2/S4 are pairs of the same view, which allowed a true role-by-role dark/light comparison. The cookie panel is dark in both.
- **Artifact filtering.** Windows ClearType sub-pixel rendering produces coloured fringes around text (e.g. #E2B776, #78B7DE, #151542). These, plus 1px anti-aliased border blends (e.g. #F6F6F5 beside #E3E3E2, #1B1B1B beside #2D2D2D), were classified as ANTI-ALIASING and excluded. Browser scrollbar colours (#9F9F9F / #2C2C2C dark; #8B8B8B light) are OS chrome and not tokenised.
- **Content vs UI.** Illustration headers (#6DA7EC, #F09978, #F0EEE6, #BCD1CA) and syntax-highlight colours are content colours. Syntax is documented as optional code-* tokens; illustrations are listed as theme-constant brand content, not UI tokens.
- **Shadows / hover.** Shadow alpha was derived from edge pixels (#C8C8C7 over #FCFCFB = ~0.21; #111111 over #151515 = ~0.19). The Sonnet card in S2 differs from its siblings (#1A1A19 vs #151515 body, #262625 vs #212121 tags, #313130 vs #2D2D2D border): documented as an inferred hover state, APPROXIMATE.
- **Unresolved observation.** S5 shows a very dark band (#0A0A0A / #090909) under the button pair. At 118x260 px its element cannot be identified, so it is NOT assigned a token.

03 Dark theme palette

Swatches are drawn on the theme's own page background. Transparent tokens are shown composited over bg-page. Token names are the final CSS names.

ORIGINAL logo mark (replaced)

05 #ABBED3 accent family

Primary highlight (locked). Derived values exist only where the reference behaviour requires them - each has a stated reason.

Figure 2 - The one confirmed orange role (brand mark) before and after. Contrast is vs the page background.

Primary accent: #ABBED3 RGB 171, 190, 211 HSL 211, 31%, 75% (hue 211, low saturation, high lightness: a quiet steel-blue - which is why it must stay rare and why it can never carry light-mode text).

ORIGINAL ROLE	ORIGINAL COLOUR	ACCENT MAPPING	EVIDENCE	NOTES
Brand starburst mark	#D97757 (both themes)	accent-primary / accent-mark	Direct replacement. CONFIRMED role.	Dark: 9.6:1 vs bg. Light: 1.85:1 - decorative mark next to the logotype; use accent-mark-light #7595B7 (3.04:1, equal to the original orange) if the mark must read on its own.
"New" badge / "Upgrade" pill	#6DA7EC blue (dark); #CDE2FB bg + #184F95 (light)	accent-soft bg + accent text (accent-strong in light)	RECOMMENDED. Avoids a second competing blue.	Badge text 6.5:1 (dark) / 4.6:1 (light) on tint.
Primary button	Neutral white / near-black	unchanged (button-primary-*)	CONFIRMED neutral. Do not recolour.	Optional single accent CTA (button-accent-bg) is RECOMMENDED only.
Focus / selected / progress	not visible	border-focus, accent-border, accent-soft, status-loading	RECOMMENDED.	Light uses accent-strong (5.5:1).
Links, nav, tabs, icons	neutral text	unchanged	CONFIRMED neutral.	Accent appears only on hover/active emphasis, if at all.

Derivation rules (every derived value)

TOKEN	D	DARK	L	LIGHT	REASON
--color-accent-hover		#B7C7D9		#9DAFC2	Dark: mix 14% white (lighten = more attention). Light: mix 8% black (a fill gets slightly deeper).
--color-accent-active		#93A3B5		#90A0B1	Mix 14% / 16% black - pressed feels recessed in both themes.
--color-accent-soft		#2D3033		#E4E9EF	Accent at 16% / 30% over page: tinted surface for badges and selected rows.
--color-accent-subtle		#212324		#F1F3F5	Accent at 8% / 14%: hover wash on accent-related items.
--color-accent-border		#515961		#CBD7E3	Accent at 40% / 60%: visible but quiet outline.
--color-accent-strong		#ABBED3		#4A6A8E	Light: #ABBED3 darkened (hue/saturation held) until 4.5:1 on accent-soft. Dark: unchanged.
--color-accent-glow		#3F444A		#E0E6ED	Accent at 28% / 35%; only for focus halos. RECOMMENDED - the reference has no glow.
--color-accent-disabled		#4A5058		#D8E0E9	Accent at 35% / 45%.
--color-accent-on-accent		#0B0B0B		#0B0B0B	Reuses the reference's ink colour; 10.3:1 on #ABBED3.

06 Semantic token table - DARK

106 tokens. Opacity column lists the alpha and base colour; HEX is the composited result over bg-page.

TOKEN	HEX	RGB	HSL	SEMANTIC PURPOSE	COMPONENTS	STATE	OPACITY	REF	STATUS / NOTES
BACKGROUND									
--color-bg-page	#151515	21, 21, 21	0, 0%, 8%	Page canvas / primary background	body, header, hero, sections, resource cards	default	-	S1-S4,S6	CONFIRMED - Dominant pixel colour in every screenshot (dark ~1.17M px). Off-black / warm off-white, never #000 / #FFF.
--color-bg-header	#151515	21, 21, 21	0, 0%, 8%	Top navigation bar background	docs header	default	-	S1-S4	CONFIRMED - Identical to page; separated only by a 1px divider (border-default).
--color-bg-recessed	#111111	17, 17, 17	0, 0%, 7%	Recessed rail (sidebar)	app sidebar	default	-	S6	CONFIRMED - Dark sidebar #111111 observed. Light sidebar not visible - value is the observed light hover/border-fill step.
--color-bg-section-alt	#1A1A19	26, 26, 25	60, 2%, 10%	Alternate section background	(none visible)	default	-	-	RECOMMENDED - No alternating sections visible; the docs page uses one canvas. Reuses surface-base (dark) / bg-recessed (light).
--color-bg-footer	#151515	21, 21, 21	0, 0%, 8%	Footer background	(not visible)	default	-	-	RECOMMENDED - Footer not captured; assume page canvas.
--color-bg-scrim	#080808	8, 8, 8	0, 0%, 3%	Modal overlay / scrim	(not visible)	overlay	60% #000000	-	RECOMMENDED - No modal captured. Composited colour shown over bg-page.
SURFACE									
--color-surface-base	#1A1A19	26, 26, 25	60, 2%, 10%	Primary raised container	code window; hovered model card	default	-	S1,S3	CONFIRMED - Dark #1A1A19 and light #FFFFFF are the code-window fills (~284k px / ~279k px).
--color-surface-card	#151515	21, 21, 21	0, 0%, 8%	Card body (outlined, same as page)	model cards, resource cards	default	-	S2,S4	CONFIRMED - Cards are NOT filled; they are separated by a border (border-default).
--color-surface-card-hover	#1A1A19	26, 26, 25	60, 2%, 10%	Card body when hovered	Sonnet card (dark)	hover	-	S2	APPROXIMATE - Dark: card 3 body is #1A1A19 vs #151515 on siblings (inferred hover; cursor not visible). Light: no difference measurable.
--color-surface-secondary-card	#1A1A19	26, 26, 25	60, 2%, 10%	Secondary card / nested panel	(same as surface-base)	default	-	S1	DERIVED - Aliased to surface-base.
--color-surface-input	#212121	33, 33, 33	0, 0%, 13%	Input / search / keycap fill	search box, Ctrl/K keycaps	default	-	S1,S3	CONFIRMED - Search #212121 (dark); #FEFEFD (light) - one step lighter than page.
--color-surface-overlay	#20201F	32, 32, 31	60, 2%, 12%	Floating panel / popover / modal / dropdown / tooltip surface	cookie panel, chat composer	default	-	S1,S3,S5,S6	CONFIRMED - Cookie panel is #20201F in BOTH themes (inverse surface). Reuse for modal/dropdown/tooltip (RECOMMENDED reuse).
--color-surface-control	#2D2D2D	45, 45, 45	0, 0%, 18%	Secondary button / chip fill	Console, Quickstart, Get API key, API reference, Write chip	default	-	S1,S3,S6	CONFIRMED - Light controls are transparent on page with a border.
--color-surface-control-hover	#373736	55, 55, 54	60, 1%, 21%	Control hover fill	(not visible)	hover	-	-	DERIVED - Next step up each theme's observed ladder (#373736 / #F3F3F3).
--color-surface-control-on-overlay	#373736	55, 55, 54	60, 1%, 21%	Button fill on overlay panel	Customize / Reject cookie buttons	default	-	S1,S3,S5	CONFIRMED - Same in both themes.
--color-surface-selected	#2B2B2A	43, 43, 42	60, 1%, 17%	Selected / active tab pill	active code tab, segmented-control track	selected	-	S1,S3,S6	CONFIRMED - Python tab pill (#2B2B2A / #F3F3F3).
--color-surface-selected-strong	#414140	65, 65, 64	60, 1%, 25%	Selected segment on overlay	"Chat" segment in composer	selected	-	S6	CONFIRMED - Light value not visible (recommended).
--color-surface-field-alt	#343434	52, 52, 52	0, 0%, 20%	Sidebar search field	sidebar search	default	-	S6	CONFIRMED - Light not visible.
--color-surface-tag	#212121	33, 33, 33	0, 0%, 13%	Tag / chip fill	Most capable, Research, Coding...	default	-	S2,S4	CONFIRMED - Observed in both themes.
--color-surface-tag-hover	#262625	38, 38, 37	60, 1%, 15%	Tag fill inside hovered card	Sonnet card tags	hover	-	S2	APPROXIMATE - Inferred from hovered-card sample.
--color-surface-disabled	#1F1F1E	31, 31, 30	60, 2%, 12%	Disabled control fill	(not visible)	disabled	-	-	RECOMMENDED - No disabled control visible.

--color-bg-page	#FCFCFB	252, 252, 251	60, 14%, 99%	Page canvas / primary background	body, header, hero, sections, resource cards	default	-	S1-S4,S6	CONFIRMED - Dominant pixel colour in every screenshot (dark ~1.17M px). Off-black / warm off-white, never #000 / #FFF.
--color-bg-header	#FCFCFB	252, 252, 251	60, 14%, 99%	Top navigation bar background	docs header	default	-	S1-S4	CONFIRMED - Identical to page; separated only by a 1px divider (border-default).
--color-bg-recessed	#F6F6F5	246, 246, 245	60, 5%, 96%	Recessed rail (sidebar)	app sidebar	default	-	S6	RECOMMENDED - Dark sidebar #111111 observed. Light sidebar not visible - value is the observed light hover/border-fill step.
--color-bg-section-alt	#F6F6F5	246, 246, 245	60, 5%, 96%	Alternate section background	(none visible)	default	-	-	RECOMMENDED - No alternating sections visible; the docs page uses one canvas. Reuses surface-base (dark) / bg-recessed (light).
--color-bg-footer	#FCFCFB	252, 252, 251	60, 14%, 99%	Footer background	(not visible)	default	-	-	RECOMMENDED - Footer not captured; assume page canvas.
--color-bg-scrim	#A0A09F	160, 160, 159	60, 1%, 63%	Modal overlay / scrim	(not visible)	overlay	40% #151515	-	RECOMMENDED - No modal captured. Composited colour shown over bg-page.
SURFACE									
--color-surface-base	#FFFFFF	255, 255, 255	0, 0%, 100%	Primary raised container	code window; hovered model card	default	-	S1,S3	CONFIRMED - Dark #1A1A19 and light #FFFFFF are the code-window fills (~284k px / ~279k px).
--color-surface-card	#FCFCFB	252, 252, 251	60, 14%, 99%	Card body (outlined, same as page)	model cards, resource cards	default	-	S2,S4	CONFIRMED - Cards are NOT filled; they are separated by a border (border-default).
--color-surface-card-hover	#FCFCFB	252, 252, 251	60, 14%, 99%	Card body when hovered	Sonnet card (dark)	hover	-	S2	APPROXIMATE - Dark: card 3 body is #1A1A19 vs #151515 on siblings (inferred hover; cursor not visible). Light: no difference measurable.
--color-surface-secondary-card	#FFFFFF	255, 255, 255	0, 0%, 100%	Secondary card / nested panel	(same as surface-base)	default	-	S1	DERIVED - Aliased to surface-base.
--color-surface-input	#FEFEFD	254, 254, 253	60, 33%, 99%	Input / search / keycap fill	search box, Ctrl/K keycaps	default	-	S1,S3	CONFIRMED - Search #212121 (dark); #FEFEFD (light) - one step lighter than page.
--color-surface-overlay	#20201F	32, 32, 31	60, 2%, 12%	Floating panel / popover / modal / dropdown / tooltip surface	cookie panel, chat composer	default	-	S1,S3,S5,S6	CONFIRMED - Cookie panel is #20201F in BOTH themes (inverse surface). Reuse for modal/dropdown/tooltip (RECOMMENDED reuse).
--color-surface-control	#FCFCFB	252, 252, 251	60, 14%, 99%	Secondary button / chip fill	Console, Quickstart, Get API key, API reference, Write chip	default	-	S1,S3,S6	CONFIRMED - Light controls are transparent on page with a border.
--color-surface-control-hover	#F3F3F3	243, 243, 243	0, 0%, 95%	Control hover fill	(not visible)	hover	-	-	DERIVED - Next step up each theme's observed ladder (#373736 / #F3F3F3).
--color-surface-control-on-overlay	#373736	55, 55, 54	60, 1%, 21%	Button fill on overlay panel	Customize / Reject cookie buttons	default	-	S1,S3,S5	CONFIRMED - Same in both themes.
--color-surface-selected	#F3F3F3	243, 243, 243	0, 0%, 95%	Selected / active tab pill	active code tab, segmented-control track	selected	-	S1,S3,S6	CONFIRMED - Python tab pill (#2B2B2A / #F3F3F3).
--color-surface-selected-strong	#E3E3E2	227, 227, 226	60, 2%, 89%	Selected segment on overlay	"Chat" segment in composer	selected	-	S6	RECOMMENDED - Light value not visible (recommended).
--color-surface-field-alt	#EDEDEC	237, 237, 236	60, 3%, 93%	Sidebar search field	sidebar search	default	-	S6	RECOMMENDED - Light not visible.
--color-surface-tag	#F0F0EF	240, 240, 239	60, 3%, 94%	Tag / chip fill	Most capable, Research, Coding...	default	-	S2,S4	CONFIRMED - Observed in both themes.
--color-surface-tag-hover	#F0F0EF	240, 240, 239	60, 3%, 94%	Tag fill inside hovered card	Sonnet card tags	hover	-	S2	APPROXIMATE - Inferred from hovered-card sample.
--color-surface-disabled	#F3F3F2	243, 243, 242	60, 4%, 95%	Disabled control fill	(not visible)	disabled	-	-	RECOMMENDED - No disabled control visible.

09 States, status colours & effects

States (observed vs proposed)

STATE	EVIDENCE	COLOUR TREATMENT	STATUS
Default	Observed (all)	surface / border / text tokens as listed	CONFIRMED
Hover - card	Observed (inferred)	Dark: body #151515->#1A1A19, border #2D2D2D->#313130, tag #212121->#262625, badge #052042->#072243. ~ +3% white overlay. Light: no measurable change.	APPROXIMATE
Hover - secondary button	Not visible	dark surface-control-hover #373736; light #F3F3F3 (next ladder step)	DERIVED
Hover - primary button	Not visible	dark #E9E8E4; light #2A2A29	RECOMMENDED
Hover - accent	Not visible	accent-hover (#B7C7D9 dark / #9DAFC2 light)	DERIVED
Active / pressed	Not visible	primary #D7D6D2 / #3D3D3C; accent-active #93A3B5 / #90A0B1	RECOMMENDED
Selected	Observed	tab pill surface-selected #2B2B2A / #F3F3F3; composer segment #414140. Optional accent: accent-soft + accent-border.	CONFIRMED
Focus	Not visible (caret only in S6)	2px ring in accent (dark) / accent-strong (light) + accent-glow. Never remove the ring.	RECOMMENDED
Disabled	Not visible	text-disabled #5E5D58 / #B3B2AD; surface-disabled; accent-disabled	RECOMMENDED

Status colours - NONE of success / warning / error are visible; only info (the blue badge) is observed

STATUS	D	DARK TEXT/ICON	D	DARK BG	L	LIGHT TEXT/ICON	L	LIGHT BG	EVIDENCE
Success		#8DC7A6		#262E29		#2B6F4E		#E3EBE6	RECOMMENDED
Warning		#E3B766		#322C20		#8A5A00		#EEE9DD	RECOMMENDED
Error		#F28B82		#342624		#B3261E		#F3E2E0	RECOMMENDED
Info		#6DA7EC		#212933		#184F95		#E1E7EF	CONFIRMED

Mapping of requested status names: online/active = success; pending = warning; danger = error; offline/unavailable/neutral = status-offline (text-muted); loading = status-loading (accent). Borders are 38% / 35% of the status colour; icons use the text colour. Hues are harmonised with the brand illustration palette (sage, amber, coral-red, blue) but are proposals, not extractions.

Effects - shadows, overlays, glow

EFFECT	VALUE	EVIDENCE	STATUS
Floating-panel shadow	rgba(0,0,0,0.20) at edge, soft falloff ~20-24px (suggest 0 8px 24px)	Observed edge: #C8C8C7 over #FCFCFB (light), #111111 over #151515 (dark)	APPROXIMATE
Elevation (cards)	None - cards are flat with 1px border	No shadow around cards in S2/S4	CONFIRMED
Inner shadows	None observed	-	CONFIRMED
Gradients / fades	None observed	Hero, cards and nav are flat colour	CONFIRMED
Blur overlays	Not observed	-	RECOMMENDED
Scrim	Dark rgba(0,0,0,0.60); light rgba(21,21,21,0.40)	Not visible; for future modals	RECOMMENDED
Hover overlay	~ +3% white (dark) / -3% black (light)	Dark inferred from S2 card	APPROXIMATE
Accent glow	#ABBED3 accent at 28% (dark) / 35% (light)	Only for focus halos; absent from the reference	RECOMMENDED

10 Dark vs light comparison

Semantic mapping: same role, two values. Role order follows visual hierarchy.

ROLE	D	DARK THEME	TOKEN	L	LIGHT THEME	PURPOSE	STATUS (D / L)

Input border vs input fill	Light		#E4E3E2		#FEFEFD	1.27:1	3.0	FAIL	Input boundary too faint

Risks flagged

- **Light muted text (#898781 on #FCFCFB = 3.50:1)** is the reference's own value and fails AA for body-size text (nav, eyebrows, card descriptions, placeholders). Kept as CONFIRMED to preserve identity; recommended fix: use text-muted-accessible #73726D (4.7:1) for text under 18px and keep #898781 for icons / large text.
- **#ABBED3 on light backgrounds** is 1.85:1 - never use for text, thin icons or focus rings; use accent-strong (#4A6A8E).
- **Borders (1.25-1.37:1)** are decorative hairlines in the reference. They are not sufficient as the sole indicator of an input boundary; add a focus ring and keep text labels.
- **Dark placeholder / muted text on #212121** measures 4.48:1 - marginally under AA (the same colour on the page background is 5.08:1). Acceptable for a placeholder, but flagged.
- **Status colours** are recommended and verified to $\geq 4.5:1$ on their own tinted backgrounds in both themes.

12 Premium visual colour hierarchy

How the extracted system produces a controlled, technical, high-end feel.

TOPIC	GUIDANCE
What the eye notices first	Contrast, not colour. The huge #F0EFEC / #0B0B0B headline and the single inverted primary button (white on dark, black on light) carry the page. The brand mark is the only colour on the chrome - now #ABBED3 - so it reads as a quiet signature, not an alarm.
How depth is built (dark)	Four near-black steps: #111111 recessed rail, #151515 page, #1A1A19 containers, #20201F / #2D2D2D / #373736 floating panels and controls. Every step is 1-3% lightness apart; depth comes from the ladder + 1px borders rather than from shadow, so dark mode never looks flat nor muddy.
How depth is built (light)	Page is #FCFCFB (warm, not stark white), containers are pure #FFFFFF (the brightest thing on screen), borders are #E3E3E2. Light mode avoids looking washed out because text stays at #0B0B0B and the cookie panel stays dark.
Text hierarchy	Three levels: primary (#F0EFEC / #0B0B0B), secondary (#C3C2B7 / #52514E), muted (#898781 both). Size and weight do the rest; colour is never used to decorate text.
Borders	Always 1px, always neutral and barely visible (1.25-1.4:1). Never accent-coloured except selected/focus states.
Cards	Not filled: they share the page colour and are defined by a hairline border, then lift by ~3% on hover (dark). This keeps long card grids calm.
Hover / active	Hover = a quiet one-step move on the same neutral ladder (+3%). Active = one step further. No colour change, no glow. Accent states (if used) are hover = lighter (dark) / deeper (light).
Disabled	Recede by lowering contrast on the same hue family (#5E5D58 text, flat fills, no border emphasis).
How #ABBED3 stays premium	It is a pale steel-blue: on dark it glows gently (9.6:1), on light it is a soft tint. Use it for the brand mark, one selected/focused element per view, and tinted badges. If more than ~2-3% of visible pixels are accent, the system has drifted away from the reference.
Shadows & overlays	One shadow only: the floating panel (0 8px 24px @ ~20% black). Everything else is flat. Scrims are neutral black, never tinted.

13 Colour usage rules

DO

- Use #ABBED3 for meaningful emphasis: brand mark, one selected/focused element, accent badges.
- Preserve the background ladder (page < container < floating panel).
- Keep secondary and muted text clearly quieter than primary text.
- Keep borders 1px, neutral and subtle (border-default).
- Use accent-strong (not #ABBED3) for any accent text or thin icon on light backgrounds.
- Keep state behaviour consistent: hover = one ladder step, active = two.
- Use derived accent tones only through the named tokens.
- Keep the primary button neutral (inverted), as in the reference.
- Keep the cookie / overlay panel dark in both themes.

DO NOT

- Do not use #ABBED3 as a page, surface, text or general border colour.
- Do not make every border, icon or link blue.
- Do not turn body text into the accent colour.
- Do not use pure #FFFFFF page / #000000 page - the reference uses #FCFCFB / #151515.
- Do not use pure black text on light beyond #0B0B0B.
- Do not flatten surfaces into one colour; keep the ladder.
- Do not introduce colours with no screenshot support (status/chart colours are RECOMMENDED proposals).
- Do not put #ABBED3 text on #FCFCFB (1.85:1).
- Do not add gradients, glows or multiple shadows - none exist in the reference.

14 Final master palette

The tokens needed to implement the system. Full lists are in sections 06-07.

TOKEN	DARK	LIGHT
BACKGROUNDS & SURFACES		
--color-bg-page	#151515	#FCFCFB
--color-bg-recessed	#111111	#F6F6F5
--color-surface-base	#1A1A19	#FFFFFF
--color-surface-input	#212121	#FEFEFD

```

14d Naming reference & implementation guidance

PATTERN	MEANING
--color-bg-*	Canvas layers (page, header, recessed, scrim)
--color-surface-*	Filled containers & controls (base, card, input, overlay, control, selected, tag, disabled)
--color-text-*	All text roles (primary, secondary, muted, placeholder, disabled, inverse, nav, link, accent)
--color-border-*	Lines (default, subtle, container, input, strong, on-overlay, focus, disabled)
--color-accent-*	The #ABBED3 family only (primary, mark, hover, active, soft, subtle, border, strong, glow, disabled, on-accent)
--color-button-*	Per-variant button parts (primary, secondary, ghost, overlay, accent, destructive) x (bg/text/border/hover/active/disabled)
--color-input-*, --color-control-*	Form parts and toggles
--color-badge-*	Badge/tag parts (incl. -remap = recommended accent versions)
--color-status-*-{text,bg,border}	success / warning / error / info (+ offline, loading)
--color-code-*	Syntax-highlight content colours
--color-shadow-*, --color-effect-*	Shadows and overlay washes

Implementation guidance

- Ship tokens as CSS custom properties on :root + [data-theme]; components must reference only semantic tokens (never raw hex).
- Start from CONFIRMED tokens; treat RECOMMENDED tokens as a draft that a designer approves before release.
- Replace #D97757 with --color-accent-mark everywhere the logo mark appears. Do not touch primary buttons: they remain inverted neutrals.
- Decide once whether the "New" badge keeps its original blue or adopts the accent remap (recommended).
- Resolve the light muted-text contrast issue (section 11) before launch if WCAG AA is a requirement.
- Re-sample hover and focus states from a live page if exact values are required - they are not captured in these screenshots.
- Keep the cookie / overlay panel on surface-overlay in both themes.

15 Verification checklist

Honest status of each requirement. "Documented as RECOMMENDED" means the item is absent from the screenshots.

#	REQUIREMENT	RESULT
1	Every screenshot inspected	Yes - all 6 (S1-S6), see section 02.
2	Dark and light analysed	Yes. Light exists only for the docs page (S3, S4); light chat UI not captured.
3	#ABBED3 replaces the orange role	Yes - brand mark #D97757 -> #ABBED3 (the only orange UI element).
4	Backgrounds not converted to #ABBED3	Yes. Accent is only fills of small marks / 8-30% tints.
5	Text hierarchy	Yes - section 06/07/12.
6	Buttons	Yes; hover/pressed/disabled/destructive = RECOMMENDED / DERIVED.
7	Inputs / forms	Search + composer observed; checkbox/radio/switch/slider/validation = RECOMMENDED.
8	Borders / dividers	Yes, exact 1px values.
9	Cards / surfaces	Yes.
10	Navigation	Yes; active nav state not visible (RECOMMENDED).
11	Status colours	Only info observed; success/warning/error = RECOMMENDED.
12	Hover / active / disabled / focus	Card hover inferred (APPROXIMATE); the rest DERIVED / RECOMMENDED.
13	Shadows / glows / overlays	One shadow observed (APPROXIMATE); glow and scrim RECOMMENDED.
14	Component-specific colours	Section 08.
15	Semantic token names	Yes - 106 tokens, role-based.
16	Visual swatches	Yes - sections 03, 04, 14.
17	Dark / light comparison	Yes - section 10.
18	Accessibility	Yes - section 11, with 2 real failures flagged.
19	Confirmed vs approx vs recommended separated	Yes - every row is labelled.
20	Usable as the official reference	Yes, with the caveat that RECOMMENDED tokens need design approval.

Counts by evidence level (dark / light): CONFIRMED 44 / 39 | APPROXIMATE 10 / 7 | DERIVED 16 / 16 | RECOMMENDED 36 / 44
